

What a  
Difference a  
Century Makes

Part 1

Tuberculosis  
(TB)

# U.S. tries to halt TB at border

Major screening also  
urged for key cities

By Susan Sachs  
New York Times

NEW YORK — With tuberculosis rampant in much of the developing world and immigration from those countries at a record high, public health officials are calling for large-scale TB screening programs in cities with large immigrant communities and at the nation's borders.

In southeast Texas, where thousands of illegal immigrants are placed in crowded detention centers after trying to cross the border, doctors have installed X-ray machines to help isolate quickly anyone who might be infected with tuberculosis.

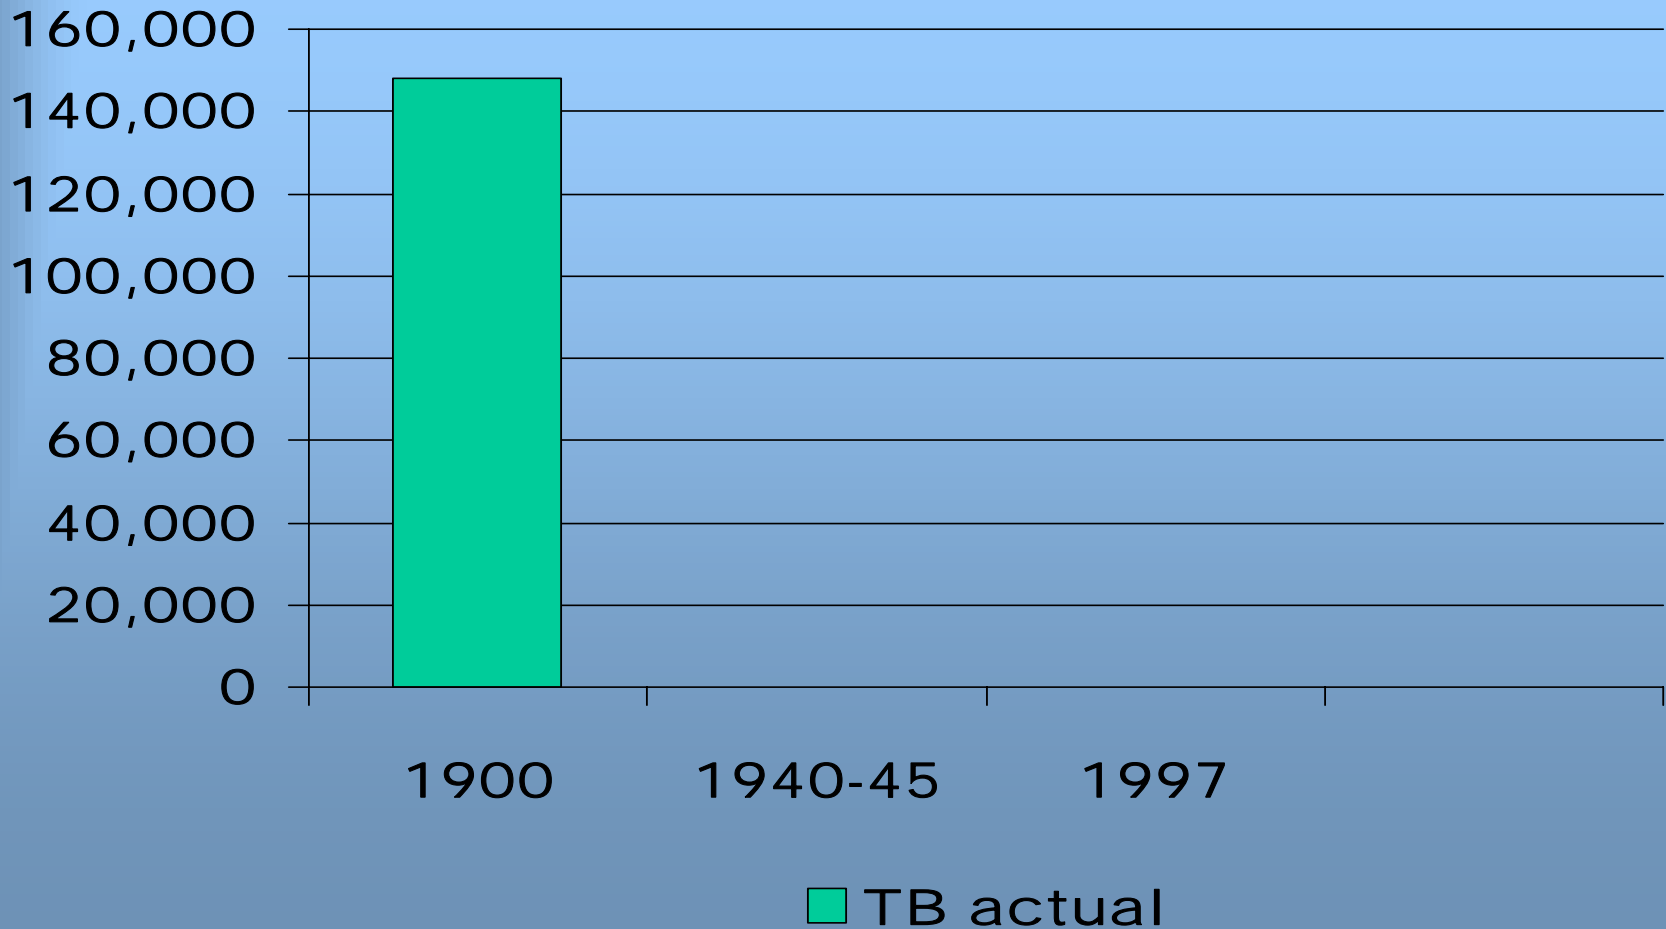

More units are expected to be installed this year in Texas. Machines also are planned for Florida and California.

In New York City and other metropolitan areas, doctors have
