

April 25, 2014 Interdisciplinary Workshop

Game Theory at UC Davis

Organizers: Giacomo Bonanno and Burkhard C. Schipper, Dept. of Economics, UC Davis

Call for Papers

Game theory studies strategic interaction in competitive and cooperative environments. It is applied across a wide variety of fields, including economics, social sciences, computer science, neuroscience, philosophy, biology, and engineering. The one-day long interdisciplinary workshop on Friday, April 25, 2014, shall bring together UC Davis researchers using game theory. The aim is to learn about game theoretic research by other researchers at UC Davis and explore potential collaborations. Lunch will be provided.

If you like to present your work on game theory, please submit your paper or abstract by **April 11, 2014**, to bcschipper@ucdavis.edu.
